Resurfacing of Bailey Avenue (US 62/CR 152) from Grover Cleveland Highway (NYS 263) to Sheridan Drive (NYS 324), PIN 5764.14
Town of Amherst, Erie County

PUBLIC INFORMATION AND COMMENT PERIOD

This notice is in regard to a pavement resurfacing project on Bailey Avenue between Grover Cleveland Highway and Sheridan Drive in the Town of Amherst. Erie County is soliciting input and comment from the public on the proposed improvements. There will be no formal public meeting for this project, however information regarding the project scope is included on the following page as well as being available on the following website:

www.erdmananthony.com/Bailey-Avenue-Rehabilitation

The project includes:

- Pavement resurfacing on Bailey Avenue between Grover Cleveland and Sheridan
- Drainage structure repairs and/or replacements
- Upgrades to sidewalk ramps at all intersections

Interested residents and the general public are encouraged to review the written and graphical documentation available. Comments or questions may be directed to the County's project manager. The County will accept comments via phone, e-mail, or written comments postmarked by Friday April 26, 2024. Feel free to use the attached comment form or complete the comment form found on the website listed above. If you require additional language services, please contact Erie County at the address below.

- Final Design: 2024
- Construction Funding Secured: 2024
- Bidding: 2024
- Construction: 2025

*Subject to available funding

Additional Things to Know:

Motorists and residents can expect that there will be some traffic disruption during the construction project, including lane closures. Pedestrian traffic will be similarly disrupted from time to time. These disruptions will be kept to a minimum and will be communicated via a portable messaging sign and updates on the project website. Work zone operations will be coordinated with the Town, Erie County and New York State Agencies. Nighttime construction will not be permitted. There will be no permanent changes to the existing vehicular and pedestrian traffic patterns.
